

First Aid Product Awareness

This session does not replace Accredited First Aid training, but is a great companion so that you know exactly what to reach for when you open your first aid kit.

What your first aid course didn't teach you!

Do you know what's in a First Aid Kit?

What are all the little neatly packaged items that are really going to help you respond quickly and efficiently to apply the knowledge you have?

This practical session will take you right through your first aid kits contents and how best to apply the products for the job they were designed for.

What is covered during this course?

First Aid Product Guide - Common items found in a first aid kit for:

- Minor Cuts & Scrapes
- Major Bleeds
- Closed Wounds
- Eye Injuries
- Burns
- CPR
